

Introduction Game

Connect with others & see what you have in common.

When doing introductions, it is difficult for some people to tell others something about themselves. It usually ends with each person telling the same things as the last person. In this activity, have participants choose 2-3 questions from a hat for them to answer with the normal questions of name and where you are from.

What is the loudest noise you have ever heard?	What is your favorite 4-H project?	What would you wish for our group?
Name all of the places where you have already lived!	What is the funniest film scene you have ever seen?	What was your nickname as a child?
What was your worst experience with bad weather?	What was your best experience as a 4-H leader?	Where is your favorite place in nature?
What is your favorite meal?	What is your favorite music?	What was the strangest experience in your life up until now?
What was the scariest experience in your life up until now?	What was the nicest experience in your life up until now?	What was your best result in school and in which subject?
