Exhibitors in Robotics Innovation/Open-Source class must complete and display a build log which contains a diagram (drawing or 3D rendering) of their robot with each of the key components labeled, an explanation of why they made the design/programming decisions they made, and a short journal sharing what they learned about the engineering design process and programming throughout their work in the project (as well as while preparing the exhibit). In addition, each youth must bring their program code (on laptop or on paper), and their robot to demonstrate. Exhibits in this class must be able to

fit on no more than a 6' x 2' table (or ground footprint), and must be fully assembled 15 minutes prior to the judging start time. No Exceptions.

3. Members in Food Decorating or Scrapbooking are allowed to enter only ONE level based on their experience.
4. 4-H'ers are limited to receive one premium per class exhibited in premium eligible projects. In visual arts if you exhibit 2 projects in Chalk/Carbon/Pigment you will only receive one premium. However, if you enter 1 project in Non-Original CCP and the other in Original CCP the 4-H'er would receive 2 premiums as these are separate classes.
5. Classification of Visual Arts projects can be confusing. If you have questions about how to properly register your project, please consult the Extension office.

Be prepared to explain how and where you got the idea for this project. Photos used as a source should be taken by the artist.*** Be prepared to explain how and where you got the idea for this project.
