Free Corn Tar Spot Screening

The University of Illinois Plant Clinic is offering free corn tar spot screening for Illinois producers in 2024. For samples with suspected corn tar spot, please fill out this form and include it with the sample. Please note: this service confirms the presence/absence of tar spot on the submitted sample; if you want a full diagnosis for your sample, please use the general diagnostic sample form and the usual diagnostic fee will apply.

Please wrap the leaves in newspaper or dry paper towels and ship in a large envelope. Please ship early in the week. If you are sending samples from multiple locations please label them and provide the information below for each one.

Submit Samples To:
