

Riverside Pollinator Gardens

3400 5th Ave,
Moline, IL
61265

Supporting Nature's Essential Workers

Located beside the greenhouse and surrounding the Demonstration Gardens, the Riverside Pollinator Garden showcases a variety of plants and flowers specifically chosen to attract and support pollinators. Pollinators, such as bees, butterflies, and hummingbirds, play a critical role in our ecosystem by helping plants reproduce, which is essential for producing fruits, vegetables, and seeds. By providing a habitat rich in diverse plant species, this garden supports the health and survival of these vital creatures.

The Riverside Pollinator Garden is not just a beautiful space—it's a living demonstration of the importance of pollinator conservation. Funded in part by a grant from Exelon Corporation, the garden is a testament to the power of community and corporate support in fostering sustainable practices and protecting our environment for future generations.
