

## Kindergarten Offerings:

- **Apple Blossom Tree**

- Apple trees bloom in the spring and ripen in the fall. This lesson is designed to help students understand the apple growth process and introduces seasons and the role of pollinators. Students gain an understanding of how apples are produced while creating a hands-on craft.

- **Sheep**

- Our sheep lesson features a picture book about sheep, followed by a craft activity where students make sheep figurines using cotton balls and paper. This combination of reading and creating helps children learn about sheep in a fun, hands-on way.

- **Circle of Earth Bracelet**

- In the Earth Day lesson, kindergarteners will read a picture book about recycling, complete a simple worksheet on environmental themes, and create bracelets using beads to represent key Earth-friendly concepts. This engaging mix of reading, activities, and crafting helps foster a sense of environmental responsibility.

- **Farm Flipbook**

- In this lesson, students will complete a pre-designed flip book focused on farm animals—horses, pigs, poultry, and cows. Through interactive pages, they'll learn key facts about each animal, enhancing their understanding of farm life while enjoying a hands-on, educational activity.

- **Farm Animals and Barn Mobile**

- In this lesson, elementary students will match farm products to their animal sources using a fun worksheet. They'll then get creative by designing their own barnyard in a craft activity, combining learning about farm life with imaginative play.

- **Dairy and butter**

- In this kindergarten lesson on dairy production, students will learn about how milk becomes butter by reading a fun book on the topic. They'll then shake heavy whipping cream in jars to make their own butter, experiencing the process firsthand and enjoying a tasty treat.
