

FOUR SEASONS GARDENING | 2021 Spring Webinar Series

University of Illinois Extension's Four Seasons Gardening program focuses on environmental stewardship, home gardening, and backyard food production.

- Attend online from wherever you have internet access.

Growing and Using Herbs

March 23 at 1:30 pm CDT

Throughout history, herbs have been used as flavorings, medicines, decorations, scents and protective garden plants. Join University of Illinois Extension Horticulture Educator Nancy Kreith to learn how to successfully grow herbs for ornamental and wildlife value, culinary use or craft projects.

What's that Bug? How to Identify Insects

Apr 27 at 1:30 pm CDT

Have you ever spotted an insect and wondered what type of insect it was? Insects are all around us and play important roles in our ecosystems. Join University of Illinois Extension Horticulture Educator, Ken Johnson to discuss how to identify different groups of insects commonly found in Illinois.

Green Screens, Fences, and Borders

May 11 at 1:30 pm CDT

The home landscape can be thought of as an extension of our living space and much like the rooms in our homes we can use plants as structural elements in the landscape. If you've visited an arboretum or botanical garden you've likely seen walls created with different plant species such as evergreens and perennial shrubs. In this talk, Illinois Extension Horticulture Educator Austin Little will discuss these design elements, some good species for creating screening, and design consideration for creating a green fence or screen successfully.
